(240)-660-6270 | apoorv@umd.edu | github.com/Apoorv-Mittal | Apoorv-Mittal.github.io

EDUCATION

University of Maryland, College Park

May 2020

*B.S., Computer Science. GPA: - 3.793, **Dean's List** in Fall 2016, Spring 2017, Fall 2017*

RELATED COURSES

Object Oriented Programming, Theory of Artificial Intelligence, Introduction to Computer Systems, Discrete Structures, First-Year Innovation and Research Experience, Applied Probability and Statistics, Algorithms (Spring 2018) and Organization of Programming languages (Spring 2018)

WORK EXPERIENCE

Student Web Developer

May 2017- present

Department of Resident Life, University of Maryland

- Migrating the website from Static to Dynamic (Drupal)
- Managing Department of Resident Life and Counselling center website and made the websites web accessible
- Creating digital marketing materials for the web, social media, and e-mail marketing targeted towards students and parents

Teaching Assistant

Fall 2017

Department of Computer Science, University of Maryland

- Taught and created course materials for Objected Oriented Programming I class.

Undergraduate Research Assistant

Jul 2017-September 2017

Department of Criminology and Criminal Justice, University of Maryland

- Worked under Professor Dr. David Maimon In NSF funded project on studying the behavioral model Wi-Fi network access
- Sniffed network traffic from location's Wi-Fi and analyze the data packets captured
- Helped create models by Data mining to discourage users from using less secure networks

Undergraduate Research Assistant

May 2017-September 2017

Maryland Information and Network Dynamics (MIND) Lab

- Worked under Professor Dr. Ashok Agarawala and PhD candidates and assisted them in Lab's daily operations
- Created an Android app to help determine the exact location of a person including the room and the floor of the building.

TECHNICAL SKILLS

Programming (Proficient)

Java, JavaScript, C, MIPS

Programming (Familiar)

Python, PHP, SQL

Libraries/Platforms

D3.js, jQuery, Bootstrap, Socket.io, UNIX

Markup/Templating

HTML5, CSS3

PROJECTS

(more at <https://apoorv-mittal.github.io/#proj>)

Meteor Landings

JavaScript, D3.js

- Used NASA API to get recorded meteor landings in JSON
- Used D3's queue library to read two JSON files simultaneously
- Used D3 to visualize the received data on a world map

Messaging App

JavaScript, Socket.io

- An online messaging app which messages updates in real time.
- Used Node.js to write the server side of the program
- Used socket.io as it provided lightweight bidirectional real-time communication

Math Question Generator

JavaScript, jQuery

- A simple math problem generator for anyone learning math and wants to speed up their basic math calculations
- Stores the score in the browser cache so that the child is engaged

Tic-Tac-Toe

HTML, CSS, JavaScript

- A game of tic-tac-toe which can be played against another human or a computer.

ACTIVITIES

Open Source Projects

Fall 2017

Improved Documentation for Facebook's react

Terps In Space

Fall 2017

Participating in a program to make an experiment which could be taken to the International Space Station
